

Shown with optional PHOTOCELL kit

# LED RE-FIT KIT

A kit includes 4 universally mounted lights to replace existing lights and a “Shore Power” system. This allows a traditional light tower to bypass the engine automatically and run off of any 100 – 270 volt power source. No switches for your customer to engage.

Easily Modernize existing light towers to:

- Reduce Downtime and Service Calls
- Provide Quieter, Better Lighting
- Extend Overall Unit Service Life
- Save Customer Fuel Costs
- Promote a “Greener” Product Offering
- Better Performance meeting DOT Lighting Standards
- Lights Are Impervious To Breakage, No Glass
- Lights Are Instant On/Off
- IP67, UL Rated for Continuous Outdoor Usage
- The most advanced LED Lighting available
- Designed and Made in USA by Signal Power for Light Towers
