

SOLARTOWER

A Mobile, Solar Power Light Tower

A breakthrough in the technology of light towers, the SOLARTower by Signal Power utilizes both advanced LEDs for lighting and an industry first lithium battery system. With the new lithium battery system, the advanced LED lighting system can perform for over 18 hours with no sunlight. With 600 watts of solar, there is enough power to keep the batteries charged. In those applications where lighting must be guaranteed regardless of conditions, check out the HYBRIDTower.com.

Specifications, SP4931ST

- 600 watts solar
- 4, 70 watt Cree LED lights, built in USA
- 26 hours run-time on full charge
- 330 amp/hr lithium battery
- Automatic start/stop system
- Auto switch between solar and 120 volt power
- Highway trailer

Dimensions

- Height max, 30' lowered, 8'3"
- Width, 61", Length, 124"
- Weight 1800 lbs (approx.)

3500 N. Hawthorne St, Ste 148
Chattanooga, TN 37406
