

# HYBRID TOWER

## *WITH VIDEO SURVEILLANCE*

OPERATE INDEFINITELY WITH  
NO OPERATOR INVOLVEMENT:  
BATTERY, SOLAR, GENERATOR

A HYBRID camera with a centralized web-based platform and built-in storage, users can find the footage they need in seconds. With features like Motion Detection, People Analytics, and Vehicle Analytics, teams can quickly search across their organization to find relevant footage, eliminating the need to scrub through incidents manually.

Built-in onboard storage, up to 30 days of continuous recordings. No need to worry about managing and maintaining devices like NVRs. HYBRID cameras can self-manage, process and safely store footage locally on each device, while cloud-based archiving allows organizations to save and share as much footage as needed.

- See overview of current status and recent events from all sites.
- Facial and vehicle recognition software.
- Instantly view incidents and play back event footage.
- Control access to your alarm sites with role-based permissions.
- Enable video verification of alarms by trained security professionals.
- Enable dispatch of emergency services.
- Configure "an ordered list" of contacts for monitoring agents to call and text when an alarm is raised.

3500 N. Hawthorne St, Chattanooga, TN 37406 (423)-332-1086
